

The builders and makers of Plaquemine Lock

Plaquemine Lock occupies the building on the corner of Graham & Sudeley streets, N1, that was formerly the Prince of Wales. It is a proud 1930s structure that had suffered years of neglect, and the project to resurrect the pub has been a loving and detailed restoration, improvement and extension.

The number of professionals who have helped make it come true is too great to list here, but thanks are given to all who had their hand in the project. The key contributors are listed below. Each is the leader in their field, and come absolutely recommended.

Jacob has amassed a number of other supporting professionals (lighting, acoustic, employment law, website builders, and even bailiffs who evicted his squatters) – please ask at the bar if you need help finding any.

Architects – Nan Atichatpong & Martin Hojny @ design-NA
